Ashwin Ramesar

Snr Web Developer | SEO Specialist

I bring over 15 years of experience in website development, with a strong focus on SEO optimization, building secure and scalable systems, and leading innovative web projects. One of my key achievements was leading an SEO initiative that helped clients reach the first page of Google globally. I've also developed expertise in marketing automation using several top-tier tools available today.

Core Services

Senior Web Developer

I design super cool websites from scratch. However my key interest is adding or developing plugin's for advanced functionalities.

CRM & CRO Automation

I have mastered great automation tools, such as Hubspot, Klaviyo, Salesforce etc to provide great support to e-commerce clients.

Senior SEO Lead

With over 9 years experience in the field, I have mastered the art of improving organic search results for websites and ppc.

Trouble Shooting

I have strong understanding of code and programming skills, which makes me a guru in front-end and back-end applications.

Experience

Aug 2023 - Nov - 2024
Visual Click Studio

Snr Web Developer | Technical SEO Manager

VCS definately tested all my problem solving skills that I have acquired over the years. Here I built websites according to figma designs with advanced features which don't really come standard with CMS builders. Each and every project was unique and required a different skillset to meet customer requirements. VCS also won a MEA African Business award for the "Most Innovative Web Design & Branding Agency 2024". We later recieved 2 MARcom Awards, through our partnership with The Branded Company in USA, where we manage all of their development. It's great knowing that I was the sole developer behind those achievements! My tasks included server and website maintenance, as well as 3rd party plugin or software recommendations and custom fitting them into the project.

Apr 2023 - Nov 2023
Kato 360

Snr Web Developer | Enterprise SEO Manager | Digital Marketing Consultant

What initially started off as a part time consultancy lead into something alot bigger and definately needed my hands on skills. I achieved my first taste to the international digital world, working on some projects in the UK and USA. Most of the time I used my knowledge in meetings to lure in potential clients. I supervised Jnr Technical SEO staff and the Jnr Web Developer whilst handling the Senior Development work which came in. I would also assist with Technical SEO tasks and internal link building as most projects were at an enterprise level and since this was a startup digital agency it needed my fast pace skills to meet targets and clients expectations.

Nov 2021 - Apr 2023
Vaperite

Web Developer | SEO Strategist

Vaperite is the leading brand in the vaping industry. As a tobacco company google prohibits any form of ads that may help the industry thrive. It has been my duty to rank Vaperite organically for numerous keywords and brands in South Africa, and currently we are sitting on position #1 for many such keywords in SA. To ensure this, I handle on-page SEO whilst liaising with copy writers on which content needs to be on our blog pages for higher rankings. I manage our social media staff and backlink service providers to ensure our rankings are always maintained. Furthermore, I am the only developer present at the office, handling the front-end and back-end integrations. Its also part of my duties to setup any branch laptops and maintain the systems and users access levels needed for branch management. Occasionally I help out with more hands-on matters, such as barcode attributions and also assist on which products would be worth while to be sold at Vaperite, with the assistance of SEO research tools.

Experience

Apr 2019 - June 2021
Bespoke Webapps

Full Stack Developer | SEO Specialist | Server Administrator | Marketing Automation Strategist

Here I built apps with native coding. I also setup databases and third party integrations for more advance features that modern webapps require in todays competitive world. SEO strategy has been my most exciting part of this role to help SME's rank well on Google and other Search Engines.

Jan 2017 - Apr 2019
Adclick Africa

Web Developer | SEO Specialist | Server Administrator | Email Campaign Marketer | Marketing Automation Strategist

At Adclick Africa, I maintained the company's servers. I also created and maintained the company's publishing website SME South Africa. As Adclick Africa is a major digital service provider, I maintained all clients who required Email Campaign setups, Marketing Automation and Motion Graphics.

Jul 2016 - Jan 2017
Website Design

Web Developer | SEO Specialist | Adwords Manager | Graphics Designer

I worked as a web developer, from liaising with clients from a prototyping stage to completed product. As most clients where start-up businesses it usually included logo and business card designs. Furthermore I would strategies and implement onpage SEO for clients as well as manage Google Adwords accounts which resulted in saving excess spend and focusing on the appropriate keywords to generate leads.

2010 - 2016
Freelance Website Developer

Self Employed

Due to my early age coding skills, I started created websites to make a few extra bucks on the side... didn't expect to make a career out of it a few years later.

Dec 2009 - Apr 2015
FNB

Fraud Analyst | Fraud Consultant

From an early stage of working I found myself in the finance field as a Fraud Analyst. This entailed analyzing card fraud cases to finalise an outcome of customer claims.
